Amazon India Dashboard

Management report | Data period: 01 Jan 2024 – 30 Aug 2026 | 10,000 source rows

Total Sales	Total Profit	Total Orders	Units Sold	Average Order Value	Profit Margin
■155,789,894	■33,167,008	10,000	24,926	■15,578.99	21.3%

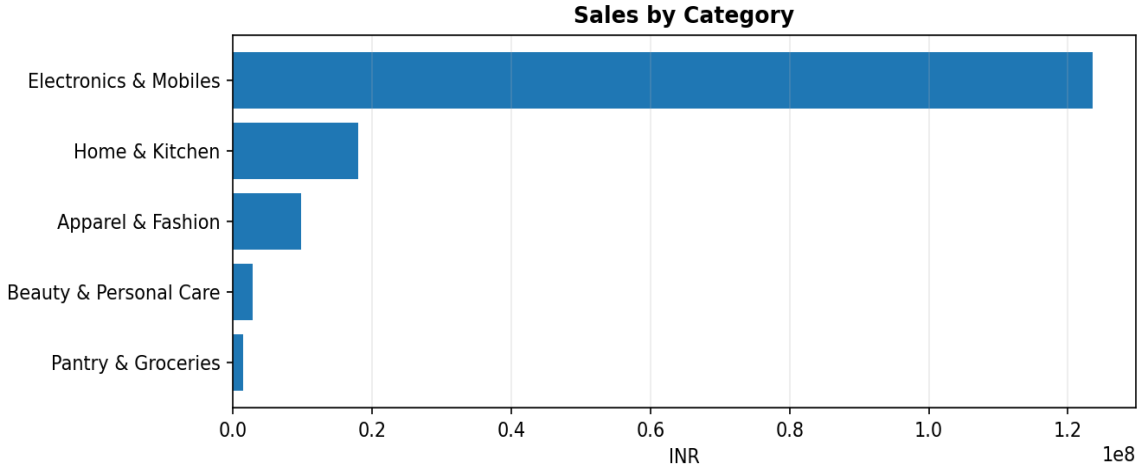

1. Overall Sales & Profit Performance

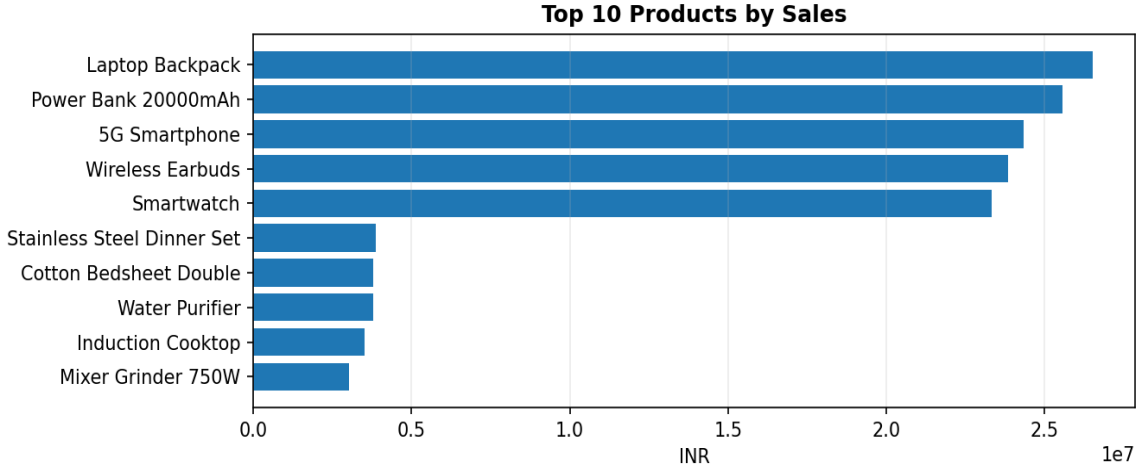

The dataset records **■155,789,894 in sales** and **■33,167,008 in profit**, a profit margin of **21.3%**. Average order value is ■15,578.99. Data spans 01 Jan 2024 to 30 Aug 2026; the last month may be partial.

2. Category & Product Performance

The largest category by sales is **Electronics & Mobiles** (■123,569,507; 79.3% of sales). The leading product is **Laptop Backpack** (■26,529,187). Detailed category and Top 10 tables are in the Excel workbook.

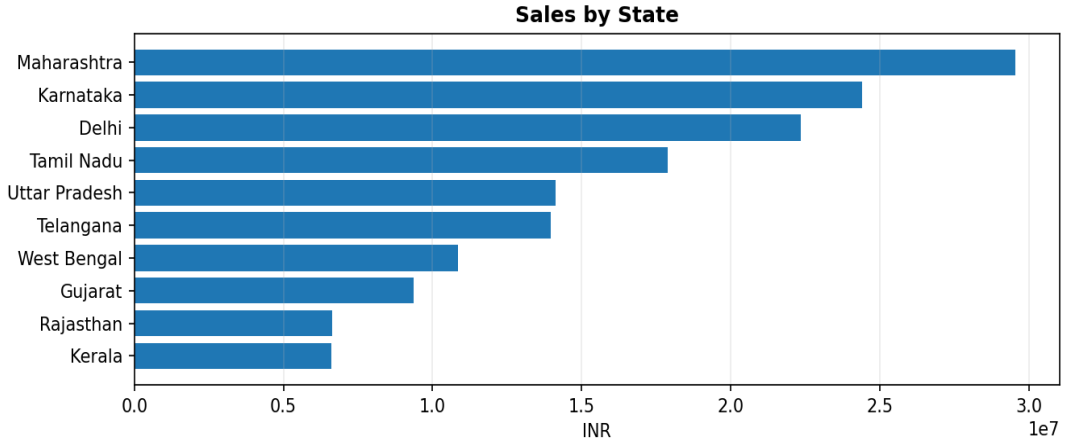

3. Order Status, Payment, Fulfillment & Geography

Order status	Orders	Share of orders
Delivered	8,147	81.5%
Shipped	868	8.7%
Cancelled	500	5.0%
Returned	485	4.9%

Returned orders: **485 (4.9%)**. Cancelled orders: **500 (5.0%)**. Rates use all unique orders as denominator, so they are descriptive dashboard rates rather than eligibility-adjusted rates.

Management takeaways

• Track monthly sales and profit together; investigate periods where profit does not keep pace with sales.

• Review returns and cancellations by category using the Category Status tab before deciding corrective action.

• Prioritize the leading category (Electronics & Mobiles) and product (Laptop Backpack) for deeper margin and inventory analysis.

• Compare state performance with payment and fulfillment mix using the companion workbook.

Definitions: AOV = total sales / unique orders; profit margin = total profit / total sales; return and cancellation rates = corresponding order count / all unique orders. Figures are calculated only from the supplied dataset; no external benchmarks or causal claims are used.
